

Ralf Klemmer

The Teamflowencer

Hi! I'm Ralf Klemmer.

I help teams find joy in their results and take pride in their responsibilities.

Beginning my career as a developer in 2007, I've progressed through roles such as team lead and architect. Along the way, I discovered that technical and methodological excellence is crucial, but not enough. True success lies in sparking enthusiasm for continuous improvement and challenging the status quo. I have had the pleasure of working with outstanding developers from around the world, speaking at conferences, and lecturing on "Modern Software Architectures". Most importantly, I enjoy helping people surprise themselves with their passion and abilities.

Here's the problem ...

- Shouldn't your developers deliver faster?
- Struggling to take responsibility?
- When do you hear about delays?
- Does code complexity kill productivity?
- Living in a bubble?
- Wasting time in meetings?
- Knowledge bottlenecks?

There must be a better way

Imagine

- ... predictable deliveries
- ... trust into your team
- ... shared responsibility & knowledge
- ... transparency within teams and throughout the company
- ... customers experience your professionalism
- ... people loving their job

How I can help ...

1. Team Coaching

If your team needs coaching on technical, methodological or teamwork skills. I'll be with your team and help you through. Typically, this is a 3-6 month engagement. Fully customized to the team's needs.

2. Private Coaching Call

Are you facing a specific business challenge and need expert advice quickly? Book a private 1:1 coaching call now. I'll give you no-nonsense advice that you can put into action immediately, guaranteed.

I'm the wrong guy

- If you think it would be just "nice to have" better ways of collaboration.
- If you think just following frame- work X will solve it.
- If you can't live with the consequences.
- If you think software development should be like working at an assembly line.
- If you want to pay me by time instead of results.
- If you think, I will do the change for you.

In any other case, I'm happy to get to know more situation.

Kind words from clients & colleagues

- *"Ralf is an outstanding Senior Lead Developer and Coach, whose contributions to any team are simply invaluable."*
- *"When thinking about Ralf, first his inspiring and motivating mood came into my mind. He is really great in building and growing teams as well as challenging ideas and thinking out of the box."*
- *"He is definitely an expert on topics like clean code, clean architecture, and agile methodologies and consistently demonstrated a deep understanding of these concepts through his work."*
- *"Ralf significantly improved the software development practices of the project, [...]. On top of that, he built a foundation which allowed the teams to sustain this positive trajectory and keep improving even after his departure."*

Too many kind messages to list them all here...

Too good to be true?

I'm very serious when I say: Pay me for results, not the time I spend. This means we need to define clear goals and align expectations. Typically, you can expect the first results after 2-4 weeks, depending on the level of access I have to the team(s). I offer different options for collaboration. To find out what fits best for your situation, we should talk.

Please don't be surprised, but I'm quite selective about whom I work with. My promise to you is that I won't waste a minute of your time if I think it's not a fit.

So, what do you think about booking a call with me?

Guarantees

I offer a 100% no-bullshit guarantee and a money-back guarantee if you're not satisfied.
